USDA Biopreferred Program Product Category	Minimum Biobased Content	Product Category Description
Blast Media	94%	Abrasive particles sprayed forcefully to clean, remove contaminants, or condition surfaces, often preceding coating.
Carpets	7%	Floor coverings composed of woven, tufted, or knitted fiber and a backing system.
Composite Panels		
Acoustical	37%	Engineered products designed for use as structural and sound deadening material suitable for office partitions and doors.
Countertops	89%	Engineered products designed to serve as horizontal work surfaces in locations such as kitchens, break rooms or other food preparation areas, bathrooms or lavatories, and workrooms.
Interior Panels	55%	Engineered products designed specifically for interior applications and providing a surface that is impact-, scratch-, and wear-resistant and that does not absorb or retain moisture.
Plastic Lumber	23%	Engineered products suitable for non-structural outdoor needs such as exterior signs, trash can holders, and dimensional letters.
Structural Interior Panels	89%	Engineered products designed for use in structural construction applications, including cabinetry, casework, paneling, and decorative panels.
Structural Wall Panels	94%	Engineered products designed for use in structural walls, curtain walls, floors and flat roofs in commercial buildings.
Dust Suppressants	85%	Products formulated to reduce or eliminate the spread of dust associated with gravel roads, dirt parking lots, or similar sources of dust, including products used in equivalent indoor applications.
Floor Coverings (non-carpet)	91%	Products, other than carpet products, that are designed for use as the top layer on a floor. Examples are bamboo, hardwood, and cork tiles.
Floor Strippers	78%	Products that are formulated to loosen waxes, resins, or varnishes from floor surfaces. They can be in either liquid or gel form, and may also be used with or without mechanical assistance

USDA Biopreferred Program Product Category	Minimum Biobased Content	Product Category Description
Interior Paints and Coatings		
Latex and Waterborne Alkyd	20%	Pigmented liquids, formulated for use indoors, that dry to form a film and provide protection and added color to the objects or surfaces to which they are applied.
Oil-based and Solvent Borne Alkyd	67%	Pigmented liquids, formulated for use indoors, that dry to form a film and provide protection and added color to the objects or surfaces to which they are applied.
Paint Removers	41%	Products formulated to loosen and remove paint from painted surfaces.
Plastic Insulating Foam for Residential and Commercial Construction	7%	Spray-in-place plastic foam products designed to provide a sealed thermal barrier for residential or commercial construction applications.
Roof Coatings	20%	Coatings formulated for use in commercial roof deck systems to provide a single-coat monolith coating system.
Membrane Concrete Sealers	11%	Products that are penetrating liquids formulated to protect wood and/or concrete, including masonry and fiber cement siding, from damage caused by insects, moisture, and decaying fungi and to make surfaces water resistant. Concrete sealers that are formulated to form a protective layer on the surface of the substrate.
Sorbents	89%	Materials formulated for use in the cleanup and bioremediation of oil and chemical spills, the disposal of liquid materials, or the prevention of leakage or leaching in maintenance applications, shop floors, and fuel storage areas.
Wood and Concrete Stains	39%	Products that are designed to be applied as a finish for concrete and wood surfaces and that contain dyes or pigments to change the color without concealing the grain pattern or surface texture.
